APP PRODUCT DESCRIPTION

Name : Danuardi Saputro (1251420128) & Muhammad Hanif Ihsanulah (1251420074)
Class : 3C

App Name	CampusHive
Problem	College students often struggle with challenging coursework, lack a fast and dedicated platform to discuss academic problems outside class hours, and have limited opportunities to collaborate across different faculties and cohorts.
Target Users	University students and peer tutors seeking academic assistance, study collaboration, and campus knowledge exchange.
Main Features	1. Course & Subject-Based Q&A: Organized forums tagged by university, faculty, and course subject for quick problem-solving. 2. Idea & Project Exchange Hub: A creative space where students can pitch project ideas, find teammates, and brainstorm. 3. Peer Reputation & Reward System: Gamified karma points and badges awarded to active and helpful contributors. 4. Direct Chat & Study Groups: Private and group chat channels for real-time collaboration.
Benefits	1. Helps students understand complex lecture materials faster through peer-to-peer discussions.

	2. Builds a supportive campus learning community and reduces academic stress. 3. Fosters interdisciplinary connections and team-building opportunities.
Unique Selling Point	Unlike generic social media or messaging groups, CampusHive is a campus-verified, structured academic platform that merges topic-focused Q&A with collaborative idea-sharing and peer-recognition incentives.
Descriptive Summary	CampusHive is a collaborative mobile application designed for university students to connect, ask questions, and exchange academic ideas. The app addresses common challenges faced by college students, such as understanding difficult coursework and finding reliable peer support outside lectures. With dedicated subject-based Q&A forums, students can ask course-related questions and receive answers from classmates or seniors. In addition, an Idea Exchange Hub allows users to share project concepts and discover potential collaborators across various majors. Featuring a gamified peer-reputation system, CampusHive motivates active participation by rewarding helpful contributors with badges and points. By combining structured academic problem-solving with community collaboration, CampusHive makes university learning more accessible, interactive, and engaging.
